<https://aungookhant.vercel.app>

## SKILLS

- HTML/CSS, Javascript
- Typescript
- Shadcn UI
- React, Next.js
- Bootstrap/Tailwind
- Laravel/php
- API
- Python/Django
- Git/Github
- Node/Express
- Firebase

## PROJECTS

### Real-time Chat Application

MERN, TypeScript, Socket.io, Shadcn UI, Tailwind

- Developed to chat with my friends, privately.
- Utilized MERN stack and Socket.io, integrated TypeScript for the type-safety, Shadcn UI and Framer Motion for seamless UX and beautiful UI. Users can create account, log in, chat with other people, and send images and audios.
- Addresses a real-world problem, showcasing full-stack development skills.

### LinkedIn Clone

React Redux Firebase FlexBox

- Recreated the LinkedIn home page as a one-page application to demonstrate proficiency in React, Redux, and Firebase. Aimed to provide a familiar and user-friendly platform for professional networking.
- Utilized React and Redux for a dynamic and responsive UI. Employed Firebase for backend services, managing user authentication, profiles, and post data in real-time. Enabled user sign-up, log-in, and post creation functionalities, closely mirroring the LinkedIn user experience.
- The LinkedIn clone project serves as a tangible representation of applied skills in front-end development and integration with Firebase. Users navigate a realistic LinkedIn interface, offering a firsthand experience of complex UI reconstruction and feature implementation.

### E-Commerce Website with Admin Panel

Laravel, React, MySQL

- Developed an eCommerce website with an integrated admin panel, showcasing proficiency in Laravel, React, and MySQL.
- Engineered to deliver seamless shopping experiences, the platform offers authentication, dynamic product filtering, cart management, and secure PayPal transactions.
- Admin functionalities include product and category management, user oversight, and order tracking, highlighting comprehensive system control.
- This project demonstrates expertise in full-stack web development and effective utilization of Laravel and React frameworks for scalable and intuitive applications.

## EDUCATION

### OTHM Bachelor Of Information Technology

MIBA • Second Year (Undergraduate)
